

# Ashish S Jadhav

## Senior Frontend Engineer

Bangalore, India | +91-8073392045 | ashishbox13@gmail.com |  
linkedin.com/in/ashish-s-jadhav | github.com/Ashish-Kasplo

### PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building scalable enterprise SaaS products using React, Next.js, TypeScript, Redux Toolkit and modern frontend architecture. Strong in reusable component libraries, design systems, workflow builders, AI-assisted editors, analytics dashboards, responsive interfaces and performance optimization. Working backend knowledge includes Node.js, Golang, Redis, MySQL, PostgreSQL, MongoDB and ClickHouse, which helps collaborate effectively across the stack when needed.

### CORE SKILLS

**Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Query, Zustand, React Hooks, Context API, HTML5, CSS3, Tailwind CSS, Material UI, shadcn/ui, Radix UI, Framer Motion, Responsive Design, SSR/SSG

**UI Systems:** Reusable Components, Custom Hooks, Design Systems, Code Splitting, Lazy Loading, Virtualization, Accessibility, SEO, PWA, REST APIs, GraphQL, Axios, Performance Optimization

**Testing/Tooling:** Jest, React Testing Library, Cypress, Storybook, Git, ESLint, Prettier, Vite, Webpack, Figma, JIRA

**Backend/Data:** Node.js, Golang, Redis, MySQL, PostgreSQL, MongoDB, ClickHouse, AWS, Docker, API Integration

### PROFESSIONAL EXPERIENCE

#### Software Engineer | Kasplo Pvt Ltd | Mar 2024 - Present

- Owned frontend architecture and implementation across Marketing Automation, Campaign Management, Audience, Analytics, Reporting and Template Management modules.
- Built enterprise Email, SMS and WhatsApp builders with AI-assisted content generation, media libraries, live previews, personalization and scheduling.
- Architected reusable React components, custom hooks, TypeScript utilities and shared UI patterns to accelerate feature delivery.
- Built complex workflow builders, configurable automation nodes, dynamic forms and high-performance dashboards.
- Optimized rendering, API orchestration and state management, improving application performance by approximately 30%.
- Worked with backend systems in Golang, Node.js, Redis, MySQL and ClickHouse when product delivery needed full-stack coordination.

#### Junior Software Engineer | Kasplo Pvt Ltd | Dec 2023 - Mar 2024

- Built reusable React components, responsive dashboards and integrated REST APIs for enterprise applications.
- Helped establish cleaner frontend implementation standards for product modules that needed rapid iteration.
- Partnered with design and QA to improve UI consistency, interactions and release confidence.

#### Software Engineering Intern | Parinitha Technologies | Jul 2023 - Nov 2023

- Developed MERN applications with reusable UI components and responsive interfaces.
- Gained hands-on experience in implementation, debugging and sprint-based delivery.
- Built early confidence in frontend development, component thinking and working with APIs.

## **KEY PROJECTS**

**Marketing Automation Platform - Visual workflow builder, analytics, reporting and reusable** node-based architecture for enterprise campaign delivery.

Tech: React, Next.js, TypeScript, Redux Toolkit, Workflow Builder, Analytics

**AI Email / SMS / WhatsApp Builder - Rich editors with AI assistance, media libraries,** personalization, scheduling and live previews for omnichannel messaging.

Tech: React, TypeScript, Framer Motion, AI-assisted UI, Reusable Components, Live Preview

**Email Intelligence Platform - Advanced analytics dashboards for delivery performance,** engagement metrics and operational reporting.

Tech: Dashboarding, Analytics, Data Visualization, Performance, Charts

**Transactional Messaging Platform - Template management, delivery tracking and enterprise** messaging UI for reliable transactional communication.

Tech: Messaging, Templates, Delivery Tracking, Enterprise UI, Reusable UI

**Reviews Platform - Customer review workflow interfaces that support moderation, management and** product feedback operations.

Tech: Product UI, Workflow, Operations, Customer Feedback, Admin UX

## **ACHIEVEMENTS**

- Reduced render cost and improved application responsiveness across production product modules by approximately 30%.
- Contributed to enterprise SaaS products that supported significant business growth.
- Standardized shared components, hooks and patterns across multiple frontend modules.
- Shipped production-ready Email, SMS, WhatsApp, Automation and Analytics experiences.

## **EDUCATION**

Bachelor of Computer Applications (BCA) | Jain University | 2020 - 2023

Frontend focus with supporting backend knowledge across modern product systems.
